Child Name: _____

Blood Lead Testing Requirements

For Ohio Children less than 6 Years of Age

There is no safe level of lead in the blood.

- All capillary (finger/heel stick) test results ≥ 3.5 µg/dL must be confirmed by venous draw. Point of care instruments such as the LeadCare® II cannot be used to confirm an elevated blood lead level, even if the sample is collected by venipuncture.
- Any confirmed level of lead in the blood is a reliable indicator that the child has been exposed to lead.
- All blood lead test results, by law, are required to be reported to ODH by the analyzing laboratory.
- The Ohio Healthy Homes and Lead Poisoning Prevention Program will respond accordingly to all blood lead levels of 3.5 µg/dL or greater.

If the family answers "Yes" or "Do not know" to ANY of the questions below then TEST—IT'S OHIO LAW! • **TEST at ages 1 and 2 years.** • **TEST between ages 3 and 6 years if the child has no test history.** **If the family answers "No" to all questions, provide prevention guidance and follow up at the next visit.**	**Yes**	**Do Not Know**	**No**
1. Is the child on Medicaid?	☐	☐	☐
2. Home Zip Code: _____	☐	☐	☐
3. Does the child live in or regularly visit a home, child care facility or school built before 1950?	☐	☐	☐
